DIGITAL GVT 1200x600mm | 600x600mm

An Innovated technology rediscovered

what is a 4K?

One higher level of clearer printing quality that is the next step after ultra high definition printing quality is 4K technology printing. Manufactured in high resolution pixels of 4000, this technology has been introduced by 'Sol Tiles' with the monopoly in the field as the most modern era product for sharper and clearer printing on tiles with real, natural and micro fine details.

Our R&D department has dedicately worked upon the printing quality to set up the highest level in printing by inventing the newer and better standards than the highest standard available in the market today. Its sincere efforts have competently retreated today's tiles world with profound quality of printing. We are skillfully launching the three premium ranges in tiles with 4K printing named Super Crystal, Sugar Finish and 8mm Slims in two sizes of 600x600mm and 600x1200mm.

By launching the 4K printing technology 'Sol Tiles' has made its name worthily meaningful.

4K PRINT

4K Digital

To impart the most accurate and aesthetically superior results to the tiles, SOL Tiles have adopted an all new 4K Digital Printing Technology. Bringing innovation to life for life like printing results on tiles, 4K Digital Printing technology is a revolutionary way to get more attractive and perfect effect on tiles.

High Strength

SOL Tiles promises beauty and elegance to your spaces for the lifetime as tiles of the portfolio comes with impeccable strength and toughness.

Multiple Application

With envious portfolio comprising the widest range of designs, SOL offers solutions for every space and place. From regular size to biggest ever size SOL Tiles offers various size options to fit in to ever dream project.

Eco Friendly

We believe in growing naturally and thus we put every practice in action to make sure nature's equilibrium is not disturbed. SOL is an environment conscious company and thus follows eco-friendly processes at every step.

Zero Maintenance

SOL Tiles are made at state of the art manufacturing set up with stringent quality control measures backed by extensive R & D ensuring products that keep the spaces cheerful and beautiful for the long time without any worry of maintenance.

SOL Tiles – an offshoot of Parker Tiles was established to introduce novel ceramic tiling solutions in the industry. A company firmly established on the values of professional excellence, design quality and transparent functions, SOL Tiles has its soul set in heralding new tiling trends that suit the need of the industry with keeping comfort, practicability and space utilization in mind.

Bringing years of experience and expertise in to the practice and with smart amalgamation of creativity and technology, SOL Tiles churns collections that are always in vogue. More than tiles they are artistic representations that fulfill the designing desires of the customers. Products that take form after comprehensive R & D backed by stringent quality processes, tiling solutions from SOL Tiles can compete with international brands of Italy and Spain.

An eco-conscious company at the heart, the company takes great care in maintaining nature's equilibrium and adopts un-polluting practices. Also dedicated towards maintaining best relationship with both clients and employees, SOL Tiles work with highest integrity and transparency at every level.

Mission

We firmly believe in continual processes and product innovation to deliver the best of ceramic tiles with fine aesthetic qualities and durability. We have established innovation, integration and excellence as our fundamental principles; in other words, a dynamic geared towards continual improvement within the framework of sustainable growth.

Vision

Leveraging its vast accumulated experience, the company has set its sight on becoming an integrated provider of aesthetic and quality ceramic tiles to customers around the world. SOL believes in continues renewal to realize its mission of becoming the ceramic company of choice for customers worldwide. We strive to achieve a consolidated, sustained and independent growth on an international basis that ensures long- term business success. Our state-of-the-art ceramic tiles are the result of clear vision, backed by definite plans and confidence over out technically sound staff, thereby we are continually meliorating the position of our company and spreading luxury in people's lives.

Quality Policies

We constantly strive to achieve the highest possible standards in our day-to-day work and in the quality of the goods and services we provide through innovation technology and meaningful human resource development. It is through our high-standard quality management system; we assure that our customers get nothing but the best of our products and services.

TILE FIXING INSTRUCTIONS

1. Plaster the surface of the floor where the tiles will be laid by smooth finish and complete the plastering and curing at least two weeks prior to laying.
2. Before fixing SOL tiles, lay them out in the desired pattern and make sure That they give an acceptable blend of colour. Please note that certain amount of shade variation is inherent in the manufacture of fully vitrified ceramic tiles. **THE COMPANY WILL BEAR NO LIABILITY AFTER THE TILES ARE FIXED.**
3. The company bears no responsibility towards the tiles exposed to any outside process like transfers, printing, firing etc.
4. For fixing SOL, we recommend the use of tile fixing adhesives for best results. Also follow the fixing instructions provided along with the adhesives.
5. For fixing SOL tiles on the floor, using sand and cement, follow the instructions given below:
 - (a) use cement and sand mortar in the ratio of 1:4, Add some water to create a consistent paste.
 - (b) Once the mixing has completed do not add any further water and use the same within one hour.
 - (c) Apply a 20-30 mm, layer of bedding material over an area of 1 square meter at a time on the surface of the area. Apply a fine slurry to the back of the tile to ensure proper and full bedding. Press gently for even adherence at the back of the tile. **DO NOT USE AN IRON HAMMER OR SOME HEAVY MATERIAL TO PRESS THE TILE.**
6. For fixing SOL tiles on Dado, we recommend the use of tile fixing adhesive with proper troweling method for 100 per cent coverage behind the tiles and for peerless bonding. Please follow the manufacturer's instructions for the same. We do not recommend the use of sand and cement for fixing on Dado.
7. Make and lay out the tiles from the center of the area to be laid so that cut tiles, if any, will be on the outer edges towards the walls.
8. The work size which we try to maintain for better technical performance is 600 x 600mm, 800 x 800mm, 600 x 1200mm on average. It is advisable to maintain a gap of 1 mm to 2 mm between every two tiles to allow for possible expansion as per BIS/EN tolerance norms.
9. Complete the laying process by pressing the cut SOL tiles firmly into place along the wall/floors.
10. Allow 3-4 days for bed curing. After this period fill the joints with grouts. Usage of grout sealant is recommended for keeping the grout free of dust.
11. Fifteen minutes after finishing the grouting process, wipe off excess grout with a damp sponge and polish the tiles with a soft and dry cloth for a clean surface. The tiles can also be cleaned with a mild acid (However, Hydrofluoric acid and its derivatives should not be used).
12. Please note that the company does not accept any liability in case of problems arising out of non-adherence these fixing instructions.

Kindly look for the arrow (➡) on the back of the tile and follow the laying pattern as shown in Pic-I :
